

**Let us design your logo,
business cards, brochures,
letterhead, and newsletters**

Creating Your Professional Identity

Let us design your company logo and provide everything you need to develop a professional identity: business cards, letterhead, and envelopes designed with your new logo.

We Do Professional Newsletters

Advances in print technology have made publishing a full-color business newsletter cheaper than ever. In fact, many color laser printers are capable of printing a full-size publication. Let us design a newsletter for you that you'll be proud to give to your customers and employees.

Business Cards That Stand Out

Business cards are an important part of your communications strategy. You want yours to look professional, impart essential information about your business, and leave a positive impression with the recipient. We can make your

business card stand out in a world of poorly designed cards.

Share Your Message in a Brochure

Let us create a brochure for your business that customers will be glad to take home with them. Brochures and other handouts are economical ways to make sure that your message gets heard and your business gets noticed.

We Make Banners for Your Business

We can create a large, full-color banner for your business. We'll do the design, take care of the printing, and even deliver the finished product to your door. We do banners for the outside and inside, including vertical banners and other signage.

We Design Restaurant Menus

Menus are such a big part of the dining experience, that the design must work perfectly, and create an inviting atmosphere for the diner. We have created menus for a number of establishments in the area. (And we have created matching websites for those restaurants as well.)
